

This August, we reviewed your Equal Payment Plan and made adjustments to reflect estimated natural gas costs for this new Plan year. The Plan year runs August through July of the following year.

In addition, your payments under the Plan are calculated by subtracting estimated charges from the actual charges incurred during the year. This determines any remaining balance or credit for the period you were enrolled.

- **If you have a credit, the amount billed is greater than your actual usage. This will reduce the total amount due on your bill.**
- **If there is a balance owed, the amount billed is less than your actual usage. You will be billed for the remaining amount.**
- **If your bill reflects a zero dollar amount due, no payment is necessary.**

Your Equal Payment Plan amount is then re-calculated and automatically renewed for the next plan year. This amount is divided into 12 monthly payments.

Annual Equal Pay Review Summary

Refer to your August bill for a summary of the following Equal Pay Plan information.

Actual Charges

Beginning balance plus total natural gas and other charges incurred during the Plan year.

Equal Payment Plan Charges

Total Equal Pay charges billed during the Plan year.

Difference

The difference between your actual charges and Equal Pay charges billed. Your account will be adjusted based on a balance owed or a credit due.

New Plan Amount

Based on your estimated natural gas usage and includes projected changes in natural gas prices. The monthly payments are divided over 12 months.
